COMPANY PROFILE

Bam Light Company was established in 2004 in the field of electric lighting materials and LED lighting. With the unique quality and design of its products and a 1 to 3 year warranty, it has earned a solid and reliable reputation with its customers. Having its own factory in China and increasing customer trust with a consulting team, good design and quality has been able to keep its products at a very high level and meet the demands of customers, markets, projects and reliability.

After of experience in our field in an effort to improve the level of the company's employees, I provided training courses on service and methods of dealing with customers for the employees. To improve the quality of its products, it takes customer opinions into consideration to always be in the forefront.

Bam Light Company offers all lighting and electrical products such as: (spotlights, keyboards, liner, magnets, projectors, garden poles, brackets, decorative lamps, doors, chandeliers, crystals)

Bam light brand has become a reliable source for major projects in Kurdistan and Iraq.

Reasonable prices, high quality, long warranty and lighting are the distinguishing features of our products.

LED LINEAR LIGHTING

LED Linear Lighting is simply the use of many 'LED' packaged together in a long, narrow housing to create a strip of light.

- What is LED?

LED is short for 'Light Emitting Diode', which is a highly efficient long-lasting source of light which uses a semiconductor to convert electricity into light. When a suitable voltage is applied to the leads, electrons are able to recombine with 'electron holes' within the device, releasing energy in the form of photons (light). The colour of the light is determined by the energy band of the semiconductor.

The demand for LED Linear is now huge and continues to grow. The difference now is that linear architectural lighting and LED technology have broadened the applications of linear fixtures. The industry continues to evolve with improvements in aesthetics and performance, moving away from the old, traditional housings, utilising materials in a better way and incorporating more advanced technology. Lux levels are important too. This is essentially the light level in a space, usually measured from a specified height.

LED Linear has a pretty strong offering. It provides a massive amount of versatility for creating unique and eye-catching designs. Bespoke angles, curves are just a few of the options available that make LED Linear an easy choice.

LED Linear lights offer a large range of colour temperatures, which affect the way the eye interprets the light. From cool white to warm white, different temperatures can be used to create mood and atmosphere in a space. LED Linear is extremely efficient to run due to its low energy usage, and also its inherent longevity, an LED will typically last many times longer than a fluorescent tube.

LED Linear Pendant lighting use suspension wires to hang from the ceiling, and are most suited to rooms with generous ceiling height. These are also ideal for creating stunning accent lighting. Surface Mounted LED Linear lights are mounted on to the surface of the and are suited to situations where pendant lights could be too low due to ceiling height, Recessed LED linear are recessed into a surface, be it a ceiling, wall or . This offers clean, uninterrupted lines.

LED Linear lights can be straight or shaped to create dramatic sculptures for ultimate effect, Straight profiles will typically create a subtler effect, but can also be used to create eye catching geometric style designs. LED linear is very versatile and can be used for a number of lighting applications :
(General lighting, Task lighting...)

LED STRIP LIGHT

New quality LED Strip 24V 2835 LED, 5 meter (600 LED's).
This is a nice bright strip suitable for most lighting applications
Will show reduced 'spotting' while installation, With 120 led's per meter.

Product information:

- Strip Size (Length Per Roll): 5 meters x 8mm wide
- LED Chip: 2835 SMD
- LEDs per/m: 120-240
- Voltage: 24V-12V
- Cutting Length: 50mm
- Color : White , Warm White,
Natural White, Red, Green, Blue
- IP Rating: IP20, IP65
- Beam angle : 20°
- Power Consumption: Approx 9.5-28W/m
- Working Temperature: -25° to +60°.

8mm

15mm

20mm

30mm

⚠ CAUTION:

- Storage Temperature: -40° to +80° .
- Installation Surface must be smooth, clean and dry.
- The part of LED components can not be fixed on the surface of the sharp edge.
- Strip should not be collided or crushed.
- Strip can be cut following the cutting lines.

LED Power Supply

LED driver is a power supply which regulates the power required for the LED strip ,our LED drivers come in many sizes, all available in a choice of 24V models.

Product information:

- Input Voltage : AC 170V-265V
- Output Voltage : DC 24 V

24 V

IP66

Output Power (max): 400W

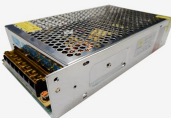

Output Power (max): 600W

Output Power (max): 100W

Output Power (max): 300W
